

1. 18
2. Female
3. (Network marketing)
4. Gadabay, Azerbaijan
5. xx.xx.1985
6. Baku, Azerbaijan
7. Bachelor degree from an Azerbaijani university.
8. No membership of political party
9. News provider: I do not read or watch news. It takes my time.
10. Sometimes I participate in some conferences in other countries.
11. Azerbaijani speaking

Summary

Part I

Freedom is the most important conception for me. Free person can archive everything. Freedom is essential. When person is free, he lives comfortably. I would not want to sacrifice anything in return of freedom.

Government should take care of it. Everybody has his own business. And, it depends on the system. If they can manage it, community may also do it. But anyway, they should have a department for this and people also should also try to protect cleaning.

I think, it would be better if women have right of abortion. Because sometimes it is better not to have a child rather than having him/her.

I think, if we had no refugees, we might help them, but we have refuge (internally displaced people) population. We need help for ourselves.

Yes, ethnic minorities should have classes at least some classes in their own languages. Nobody should forget his/her roots.

If people understand each other well, it is not a danger. But if everybody demand more resources than they need, it can turn to danger. If people get along well, it is also a culture. I do not see anything bad about it unless they have ambitions to invade somewhere.

They codependent of each other. Without government and economy, society cannot exist and vise verse.

Part II

I identify myself as somebody who cares about people, who wants people to live happily. Also, a networker. And I am proud of it.

Yes, I am happy about being in Azerbaijan but I always think that I am a world citizen. God created me and this world for each other.

It depends. We need religion. Specially our religion (Islam) is the last one, Koran is the last holy book. Everything has its manual. If you buy a cellphone, it will have a manual and Koran is manual for people. People should behave according to Koran.

Nation means unity for me. For instance, there are a lot of Azerbaijanis around the world, not just in Azerbaijan. But nation is something that unite us.

Borders are good in terms of preventing chaos. It is good to have borders between countries, between people and between cultures. But in fact, borders are just physical. Telephone and internet annihilate borders.

I personally do not use social network. I do not like it. It takes a lot of time; it is like a disease. But I think if you use it for good, it will be beneficial. Internet and social network are different things. I cannot imagine my life without internet. Social networks such as Facebook, Ok.ru and Instagram are waste of time. I do not have time for that.

If people understand each other, nothing bad can happen. But if everybody try to ensure its own interests, then it can lead to bloodshed. In general, everything has been different for people, it can lead to problems.

Part III

Nagorna Karabagh conflict has not been resolved, because it depends on foreign powers. I'm actually not interested about politics, but I think so.

We are not culprit but they (foreign powers) are. No, I do not want to go to the details. I do not like it. Even I do not watch news.

From my perspective, the way to resolve to conflict is doing it by our own. If foreign powers let us do it, we can get Karabagh back just in a day. I mean both with military and peacefully. We can destroy them (Armenians) easily.

As I mentioned before, freedom is the most important thing. But we do not have full freedom in this situation; our lands are occupied. We are the whole. And everything has its cost. If want to get our full freedom, we should pay its cost. It has always been like this historically. Even if we are free now, it is because of the people who sacrificed themselves for us. I would not want that, but I think we should revenge. We should bloodshed. It seems like the only way. Maybe I will be the one who should be sacrificed for this, or may be somebody else. But it is the only way. We signed some peaceful agreements that some territories will be given back to us. However, it did not work out. But if we did it with military ways, now we might be holding those territories.

I think, if conflict can be resolved, nobody will go and live there except older people. But people will travel those lands, there will be recreational resorts there. Those lands are very beautiful, I know it. No, only Azerbaijanis will leave there. It will belong to us.

I am not sure about who or what is our main enemy. It is cliché that Russia is our main enemy, but I cannot say something about it.

Nagorna Karabagh belongs to Azerbaijanis.

We can resolve it ourselves. But foreign power should stay away from this. We are not a weak country. I do not accept when people complain about unemployment. There are a lot of opportunities. At least, my job – networking creates a chance for everybody to live better. Just people are lazy and they like to blame others for their problems. We cannot expect from the government or president to rule millions while they cannot control 4-5 people in their family. They (people) want us to be like Syria. We live quietly at nights. It is something very important. We have good state, good government and good president. Gallants always get what they want. Poor people has something in common; they always wait for somebody to do something for them and they die like that. In Azerbaijan, people live luxury life; restaurants are full, everywhere is full of brand cars, wherever you go, you can find Azerbaijanis in luxury hotels. Just some people are lazy.

I do not know history well, but I would like to mention one point; After World War II, somebody asks a Japanese, who won the war, The USA? He responds that, not, Japan won the war. When he is asked “why”, he says that, go and check US President’s desk; everything on is Japanese technology. What I mean by this, is victory is not about getting territory, something else can define it differently. Azerbaijan won this war. We are much more stronger than them (Armenians), just it is a matter of territorial integrity and I am sure that it will be resolved soon.

No need for reading the options. Stop there. Nagorna Karabagh always belonged to Azerbaijan and it will be a part of Azerbaijan. Just they (Armenians) were living there. They used to have autonomous territory, but it was a part of Azerbaijan all the time. Hopefully, it will be taken back soon. I have driven to Yerevan with my own car. It was about 270 kilometers from Lachin to Yerevan, and just 25 kilometers to Gorus. I used to leave my car there and when I am back, nobody used to touch it. It was staying there safely. (Cursing miscreants)

Only and only presidents of both countries should seat and solve this problem peacefully. They should find a way out of this conflict. Not the way for revenge, but peace. Only and only peace.

I think, there is no other conflicts just like Nagorna Karabagh. It is so complicated that, I cannot compare it to anywhere in the world. This territory has always been a part of Azerbaijan; it must be and it will be again. It is just a temporary situation.
