5. Baku, Azerbaijan
6. Studied Moscow
7. Bank
8. Internet, online media
9. Once a year
10. Russian speaking

**Summary**

**Part I**

Freedom is the most important concept for me. A person should be free. Security comes after freedom.

Government should take care of cleaning of town. Citizens can support it.

Women should not have right to abortion. It is almost a crime.

Azerbaijan should accept refugees and immigrants.

Ethnic groups should not study in their own language or their own school. In Russia where I studied, I did not see usage of Azerbaijani language in any school or university.

Ethnic and cultural diversity is enrichment of the society. We can take positive sides of all cultures. Our nation is already rich. Still we can take some more positive sides.

Humans should come first. Even in war, situation humans must be helped first.

**Part II**

I am citizen of Azerbaijan.

I would emphasize being Turk and being Azerbaijani citizen. I am Muslim, but I am not emphasizing it.

Religion is used for good purposes. I try not to see bad sides.

Nation means a union, my ethnic root, my culture. Nation are symbols.

Borders are important. At least we financially benefit from it though taxes and fees I customs service in the border.

Eliminating this borders though internet is useful.

Restoration of historical borders will lead to strengthening of nation and nation state.

**Part III**

External powers hegemon states do not allow the conflict to be solved. There is no compromise. They should be blamed. I see the solution of the conflict though war. Of course, though peace would be better. However, I would not mind to have war, I am ready to fight.

**Interview#29 | Bank sector | Duration: 20 mins 40 sec**

After the solution of the conflict through war, it will be hard for people in the begging. Nevertheless, I do not think that IDPs will return to these territories. There are rich families who might start business there. However, majority of middle class IDPs would not permanently move there. I would fight and die for that land even if we are not going to live there. The main thing is to bring the territory back. It is a blood feud. I do not imagine living with Armenians together. When I was studying in Russia, I did not communicate with any Armenian.

Terrorists are the enemy of the world. Our enemy is Armenians.

Nagorno Karabakh belongs to Azerbaijanis.

I do not see the role of external actors in the solution of the conflict. The conflict can be solved by only Armenia and Azerbaijan states. However, they do not find compromise, because Armenia is insisting and not constructive.
