10. Azerbaijani speaking

## **Summary**

### **Part I**

Protection of fundamental human rights in the society. If my rights are protected, then the rest of the concepts will be provided as well.

There are special agencies to do it. Municipalities can do it. But, I don't think local communities or group of people can manage it by themselves.

I think, YES. Women should have rights for abortion. it is impossible to ask women to give a birth or not. Woman's body belongs to her.

I think, only societies that have respect to human rights should receive refugees. if the government cannot provide basic needs of people, then I don't think that government should do it. But, in case of Azerbaijan, NO. Azerbaijan doesn't have such kind of opportunities.

Yes, of course. I even don't understand people who doesn't recognize this right of ethnic diversity. If ethnic minorities have little bit desire, they should be provided with it. Their cultures and traditions should also be promoted. But, they also need to learn official language in order to get integrated into the society and find a proper job.

No, they are not threat. I consider politics of the government against them.

People and Society.

### **Part II**

I have mono identity. I am a journalists. I never mention the rest of the options.

In general, religion is used for worst. Aggression.

In general, nation is territory, except US.

Of course, physical borders are important so far to protect ourselves. People have not reached in a level that we can eliminate the borders.

It is very good. As I told, I can't travel to any county. But, I can easily get information about different countries through internet.

The restoration of historical borders can only cause conflict, war and bloodsheds. It is nonetheless to talk or request historical territories.

### **Part III**

Big powers – Russia doesn't want to solve it. Or, US cannot solve it. US would like to solve this conflict in order to increase its power in the region.

We-ourselves are to blame. There are some people that they accept status-quo. Believe me, news about Nagorno-Karabakh is the least to be read. – this is my own observation. Nobody discusses this issue. Even, the opposite parties organize movement, none of the IDPs reacts.

From my point of view, Nagorno-Karabakh conflict should have solved with respect to the territorial integrity of Azerbaijan. I support peace. But, if Azerbaijan can solve it through war, I would also support in order to restore justice and rights of territorial integrity of Azerbaijan.

I am positive that people will live in peace with each other. Even, Azerbaijanis and Armenians live together in different countries, like in Georgia. They are not enemy with each other because of the Nagorno-Karabakh conflict. But, life-standards should be very attractive in the Nagorno-Karabakh that Armenians would appreciate to live there.

The biggest enemy of Azerbaijan is religious radicalism and Russia. Right now, Russia is the first one.

Nagorno-Karabakh conflict belongs to Azerbaijan. Armenians can come and live there. Even, Armenians might be more than Azerbaijanis there.

Resolution of the Nagorno-Karabakh conflicts depends on the development of political processes in Russia.

There are some precedents for Nagorno-Karabakh conflict. For example, Kosovo. But, Russia is the main factor and threat to us, as I told. But, territorial integrity is very important for Azerbaijan.
