Summary

Part I

Protection of fundamental rights is the most important. It is the core of all those four concepts. By protecting fundamental rights eventually, all three other components will be ensured.

Government should take care of the cleaning of the town. The next step is that citizens follow government policies and take care of cleaning of their own town.

This is a disputable topic. However, I think women should have a right to abortion. There is some limitation regarding the duration of the pregnancy. I think it is not normal to ban abortion. After some duration if the fetus inside mother is feeling pain while this process, it is violence.

We should accept refugees. It is a part of fundamental freedoms. If we consider ourselves democratic and civil state, it is our responsibility to take care of it.

Ethnic groups should have a right to study in their own language. I do not think ethnic groups are threat to the society. Ethnic and cultural diversity is enrichment of one society. When the ethnic groups rights do not maintained they correlate it with nationalism and they think that it is discrimination against their identity.

For me humans comes first. In authoritarian states like us, state is a strong structure. In democratic states government serves for people. Government should not totally control the economy. It should support the economy.

Part II

I am an activist and public journalist. I studied truism, but I cannot practice my knowledge because of current public, political problems.

I am a citizen of Azerbaijan and it is important part of my identity. I do not prefer other categories like ethnicity or religion or citizen of world.

Different religions uses for different reasons. For instance, Christianity has reformations and is using for peace in Europe. Islam is used for conflict, even among its own sects. Some religions are bringing peace, some religions brings conflict today.

Nation is the union of language. It is not territorial. State nationalism is eventually getting popular in Azerbaijan.

Interview 15.G | Duration: 1 hour 06 mins 35 secs

Today border are essential. In some regions, there are still fights over borders. But I do not think borders should matter. The main thing is human. Humans should be able to the other sides of the borders. Unfortunately, in 2016 borders are important.

Eliminating these borders in internet is good. Humans are able to communicate more people. By getting to know more people, your approach to other groups change. All groups should coexist together for the future development of world.

Restoration of historical borders is not a good attempt today. Humans should not kill each other over territories nowadays. According to UN declarations, each state has defined border and each nation should live there without intervention of other parties.

Part III

This is an imperialist will. If Conflict would depend on the will of two nations, the conflict would be solved soon. They are hegemon states which prevent the conflict to be solved.

We should blame current political regimes of Russia, Armenia and Azerbaijan. Russia does not allow the two states to be democratic and solve the conflict.

The solution of conflict should be through peace. Though war, more disasters will happen, more humans will be lost, more wounds will appear. The government supported by citizens is able to solve the conflict. In 1998 there was such opportunity to solve the conflict. It failed because of the “unseen hand”, who is still controlling this region.

Armenians have lived there. Without them, the conflict will not be solved. After the solution of the conflict, all neighbors will live together very easily. In peace building program in Georgia, we meet with Armenians. We communicate very well. There are bad memories, but also good memories in the past. We should focus on good memories. Two enemy nations is able to live and co-exist together.

The biggest enemy of Azerbaijan is Russia. For a long time Russia has control this region, has oppressed the intellectuals of Azerbaijan. Today Azerbaijan government informally is dependent on Russia.

Nagorno Karabakh belongs to Azerbaijan as territory. As a community more Armenians lived there and they belong there. As a community it belongs to Armenians and Azerbaijanis

The conflict can be solved only by two states (Armenia and Azerbaijan). Neither international organizations, nor Russia is going to solve this conflict.

There are a lot of conflicts in Europe. Like France and Germany, where there was a conflict for a long time, they managed to solve it and now they live together. When the states are democratic, the people do not care much in which state they belong unless their life standards are good.
