11. Azerbaijani and Russian speaking

Summary

Part I

All of them are important for me. We have fought for freedom. But, political stability and protection of fundamental rights are much more important for me.

Of course, some agencies of the government should take care of the cleaning of the town. Centre of Baku is very clean, but not in suburb areas.

Of course, YES. If the woman wants to do abortion or not. It depends on herself and her family. But, I am against selective abortion.

No, we are able to receive new refugees and migrants from other countries because we have our own IDPs and refugees. Since, we couldn't create better life standards for them, Azerbaijan shouldn't receive new ones. I am against it.

Ethnic minorities don't have problem in our countries. They have their own schools in their communities. Of course, they can study their own native language, but, they also need to learn the official language of the country, which is Azerbaijani. It is because of their integration to the society. They have to be able to save their culture, history, language and traditions. But, whenever they want to get job, they need to know in Azerbaijani. Even Armenians had more chances than other ethnic minorities in Azerbaijan because, Armenians had university in their own language in Stepanakert. They used to go to Armenia after graduating their degree.

Of course, ethnic and cultural diversity is an enrichment in a society.

If the economy develops, it will also improve the well-being of population, of course. People complain that pensions did not get rise. This depends on you. You have to work and pay tax, then we should have more pension.

Part II

Human who is 75 years old. I am working for God, today. I want to see Azerbaijan as a real democratic country.

I accept all of these options as my identity.

In Azerbaijan, religion is used for worst. For instance, I don't like religious situation in Turkey. My relatives have very historical religious background. Religion is very fair, indeed. Main

concept of religion is human-being. But, religion is used for different purposes in Azerbaijan. I only like Haji Ilqar Ibrahimoglu. But, I am against Sharia law, which Haji Ilqar appreciate it.

Nation is human for me. First, nation should be intelligent to understand all the process. Otherwise, nation cannot be nation.

I think, physical border is not good. Of course, we are not ready for it yet.

Internet and social network is very good. For example, I can get in contact with different people from different countries.

Restoration of historical borders is not rational thing.

Part III

If resolution of the Nagorno-Karabakh would only depend on Armenia and Azerbaijan, this conflict could get its resolution from the beginning. But, third countries do not let them to solve it. We could ask them to return surrounding territories, and invest in the Nagorno-Karabakh by Azerbaijan and Armenia, then that would be perfect. Then, Nagorno-Karabakh wouldn't need to have borders. Why we should have war? – there were numbers of killed people from both sides. I understand it is motherland. But, we don't need to loose human because of the territories. Let investors come to the Nagorno-Karabakh to invest there. This is how I see the resolution of the conflict.

Whether I like the government or not, it can implement independent politics. This government tries to find a common language with Russia or West. But, the word "enemy" is not appropriate word or notion for human-being. Who is Armenian is my enemy? I don't understand this world. This might have in politics.

Only Armenians and Azerbaijanis are able to solve the Nagorno-Karabakh conflict. Politics cannot solve it because of egoism. We took some women to Cyprus to participate in confidence-building project. There was a guy from Armenia whose father was killed in the war. We also had another woman from Azerbaijan whose brother was killed in the war. He said that he was criticized because of taking part in the same event together with Azerbaijan. The same scenario happened to our lady from Azerbaijan. But, they talked to each other and he told that why we should kill each other. We were facilitator. But, believe me, they didn't care us. They just easily talked and shared their stories to each other. I mean people can easily live together in peace. Human cannot be enemy of each other.

Aland island is one of best precedent conflict to be applied to the resolution of the Nagorno-Karabakh conflict.
