

1. 33
2. male
3. 50 years old
4. Aghdam, Azerbaijan
5. Baku, Azerbaijan
6. University degree, Azerbaijan
7. No party membership
8. Teacher
9. Online media (qafqazinfo)
10. not often, usually for the education contests
11. Azerbaijani speaking

Summary

Part I

All of these concepts are interconnected. Freedom is the most important. Without being free, we cannot have other components.

Government and its organs should take care of it. Citizens should also be attentive about the clean ecology of their town.

Women should be able to have abortions.

Azerbaijan should not accept new refugees. First, it should take care of its own refugees, give them better life.

If there is enough teachers, professors to teach ethnic groups in their language, it is ok for them to study in their own language. For instance, there are Russian groups in many schools in Azerbaijan. There can be schools for other languages as well. There is not enough teachers who can teach I those language, perhaps in the future they might have enough teachers and resources to teach in their own language.

The cultural and ethnic diversity is a natural process and it is good to preserve this diversity. I do not see any threat from this diversity in nowadays Azerbaijan. These groups are satisfied they do not complain about their life in Azerbaijan. To have mono ethnicity within the state is not good, like in Armenia.

Economy, government, society and human are interconnected. There is no government without human and no society without government.

Part II

Being Azeri turk is the most important. Because we were turk before we were Muslims. Overall, the main part of my identity is being Azerbaijani, my citizenship.

Religion is directed to be used for bad purposes. The consequences of it is harmful. However, personally religion is moral, is faith. It depends on how people use it and for what reasons they use it.

The first components that makes nation is language. Because you can live abroad, but if you speak in same language, you are part of the nation. Then comes the territory.

In today's world, it is necessary to have borders. Although there are borders, there are still so many problems. Imagine, how it would be, if there were no borders. It would be threat to security.

Overall, it is good to eliminate borders though internet and you cannot prevent it. A person cannot live isolated or without receiving information.

There are so many nations who did not exist in their current territories, for example Russia or USA. The peoples from different nations lived together through different times. We cannot go back to 100.000years and see which territories belonged to which current states. The question is what historical borders in what time we want to restore. Therefore, it is better to remain current borders. The borders are abstract and they were different in different historical times.

Part III

The conflict is not solved because of super powers like USA or Russia. I think this conflict is more of the conflict between them than conflict between Armenia and Azerbaijan. Because if Azerbaijan alone could make a decision, currently we have enough power to free our lands.

Obviously, the people whose land is occupied cannot be blamed. The main guilty is Soviets. After the collapse of big empire the many clashes appeared, like ours. The negotiation process is not successfully because Armenian government is not constructive. They do not fulfill their duties and promises. In the critical moments, they use this conflict to remain in power in Armenia, like in 1998. I think our current position is correct and I support it.

The conflict will not be solved either with peace or with war. If you look at April's escalation, you will see how willingly people were to fight. Before the escalation, everybody was saying that, no one wants to fights, but during the situation in April, in Aghdam for instance people wanted to fights voluntarily. Therefore I think, the conflict should be solved neither with total peace nor with war. We should show how Armenians our power by military in order to bring them to the table to have solution. In any case, we cannot solve it with only military way, because we will not be allowed by superpowers.

I think that after the resolution of the conflict Azerbaijanis and Armenians will live together, just like we lived before the war. This conflict is artificial, made up by third parties. Therefore, there will be no problem of living together.

I think the biggest enemy of Azerbaijan is our people who are indifferent to the current situation of Azerbaijan, who do not care about the current situation in Azerbaijan.

Nagorno karabakh belongs to Azerbaijani. Russians moved Armenians to these areas during Tsar Times. Therefore, it belongs to Azeri turks.

Russia is the main actor who can solve this conflict.

We cannot use the models from other countries to solve this conflict. Because we have different mentalities, different behaviors. For instance, Europeans are cold blooded, calm people. We should not use their approach to solve our conflict. In each of us, there is a call for revenge. Territory is our honor, a part of our national identity. We will not forget what happened in the past, all those terrible things that happens. Even if we might show on face that we reconcile, but deep down we will never forget.
