11. Azerbaijani speaking

Summary

Part I

Fourth concept – protection of fundamental rights is important for me. Let's think, if there the fundamental rights are not protect, how the rest of those you mentioned might be created.

No. the government cannot do take care of everything by itself. Private companies should help. Look at Binagadi district case. You cannot find any garbage there, since, private companies are involved in cleaning of the town. But, the rest of Baku, where the government is responsible to clean, is full of garbage everywhere. This is what see the reality.

No. We are living in Azerbaijan. Women cannot have the rights of abortion here.

No. We have enough refugees in Azerbaijan.

Ethnic minorities should be able to study in their own native language. In Azerbaijan, they have education in their language. For example, Talish can study in their language.

Ethnic and cultural diversity is a threat. Look, it is said on TV that some people who was spreading different religious things were arrested recently. They are the same people. They come to Baku and start their illegal activities.

First is human-beings then, the government. But, the government should control the economy. It is very important.

Part II

I am Azerbaijani. I only introduce myself as a citizen of Azerbaijan everywhere.

Religion is only used for better and peaceful purposes.

What is nation for you – I cannot answer this question. I don't know.

Borders should exist between the countries.

Internet is very bad thing...very-very bad... Internet has taken this nation to the bad things. Don't expect any good thing from the internet.

No... restoration of the border wouldn't cause anything bad thing. It is only for the purpose of improvement of security in the society. Every state should have those borders for the sake of its security.

Part III

Russia and Iran doesn't give an opportunity to solve the Nagorno-Karabakh conflict. The main actor is Russia. If Azerbaijan would let Russia to protect its border, even tomorrow, the Nagorno-Karabakh conflict would find its resolution. Azerbaijan doesn't trust Russia. That's why, Russia doesn't want to solve this conflict. Russia is the first one to blame. When the war started over the Nagorno-Karabakh, Iran and Russia put their flags in different parts of the territory... whenever they realized that dividing this country seemed impossible, then Iran took back its military and troops during a night.

If Azerbaijan compromise to Russia, then this conflict can be solved. Otherwise, it will not be possible. When I say, compromise, I mean Azerbaijan should let Russia to deploy its military troops in Azerbaijan.

If the Nagorno-Karabakh conflict is settled, ordinary people will peacefully live together as happened in previous – Soviet times. It is absolutely possible. But, it is in the hands of Russia. Everything depends on Russia. People will forget about the war, killings and other atrocities that have happened.

The biggest enemy of Azerbaijan is Russia.

Nagorno-Karabakh belongs to Azerbaijanis and Armenians.

Only Russia is able to solve the Nagorno-Karabakh conflict.

No. even if find any precedent conflict and apply it for the Nagorno-Karabakh, we will not be allowed to implement it. That's why, it is impossible.
