9. internet
10. once a year
11. Azerbaijani speaking

Summary

Part I

If the political stability exists in the country, the rest of the concept would be covered under the umbrella of it in the society, county.

I think, it should depend on people to keep their cities or towns clean. Other countries, like Turkey have their municipalities. But, in Azerbaijan case, it is little bit difficult and different. In any case, the government cannot manage it by itself.

In general, I am against the abortion right. I think, it is crime to kill human-being by doing abortion.

From my point of view, we are not capable of receiving migrants and refugees from abroad. Because, Azerbaijan has more than one million. And, the problems of those refugees has not been solved yet. They live in different dorms; they don't have proper jobs. The government first of all think its citizens. Later, it can receive anybody.

Yes. They should have this right. They shouldn't forget their past, history. As I know, in our country Lezgis, Talishes can study in their own native language in the schools as well as, there are some language faculties at some universities of Azerbaijan. They can easily learn their languages there.

Ethnic and cultural diversity is a huge enrichment, from my point of view. This is just multiculturalism. However, if there is a tendency for separatism, then it should be evaluated as a threat. It is also dangerous for the security of citizens in that county.

If the government aims to serve for the sake of people, then I think, the government and taxes should come first. Because, the government starts to open new job opportunities after collecting those taxes. – how happens in the European countries. But, of course, human and society should come first. The government should control the economy in order to hinder the monopoly and adjust the market. But, it this intervention should be minimum.

Part II

I am a silent person. I am just having rest with my friends. I have only one identiy, which I try to be the same person to everybody.

Simply, I mention my name and surname. And, if I am abroad, I mention my citizenship. But, in general, I present myself as human.

Unfortunately, religion right now is used for worst things in the world. As we see in the Middle East, the religion is used for political and other goals of different groups, people.

Nation is first of all is geography for me. I mean, we have special culture, folklore, language, life-style which comes from the past. These are the things makes us same with other nations and different from others.

Physical borders between countries are important in our region. In Europe, they have don't have which is very good. But, the situation is different in our region. That's why, borders should exist in order to not let other illegal activities happen in the country.

Internet and social networks are very good, which give us opportunity to know people and get in contact with others who we don't have chance to meet them face-to-face. We exchange our ideas, life-style and learn from each other.

All the options might happen if the government tries to restore its historical borders. But, to put in specific terms, if this happens, it is more likely that will cause war and bloodsheds.

Part III

Everybody knows that the "key" of the Nagorno-Karabakh conflict is in the hands of Russia. Indeed, Armenia is not such a powerful country. Only Russia back them in this conflict. Russia sells its weapons to Armenia and get benefit from it.

The political regime in Azerbaijan in early 1990s is to blame. Internal clashes, betrayals caused these causalities. However, nowadays, as we know, Russia is hegemonic country. And, Armenia doesn't have any right as a state. They only listen to Armenia.

In general, I would like to solve this conflict in a peaceful way. As a person who lost his relative, I would prefer peace. But, at the same time, if the war option emerges, we should be ready.

Azerbaijanis and Armenians can live together in the future, if the conflict is solved in peaceful way. But, I don't find it possible right now. Now, we can't live together. We call it as Armenian-Muslim war. We need may be 50-60 years to reconcile with Armenians. If we get Nagorno-Karabakh back, we can build up there and flourish tourism there.

The biggest enemy of Azerbaijan is Armenians.

Of course, Nagorno-Karabakh belongs to Azerbaijan. Even, Yerevan belongs to us.

We can solve this conflict, as a nation. But, as I mentioned beforehand, Russia is the main actor. Russia will not let us to solve it. Armenia will also return our lands back either in peaceful war or with war.

I don't remember any conflict that is solved which can be applied for resolution of Nagorno-Karabakh. I only remember, Cyprus, which is not resolved yet.
