7. Agh (White) Party
8. Reception, private education house
9. Mostly social media
10. not often
11. Azerbaijani speaking

Summary

Part I

I believe the protection of fundamental rights is the most important. We live without freedom for a long time, but if the fundamental rights will be oppressed, we will be very dissatisfied and it will be hard to live like this.

People along with the government should take care of the cleaning. If citizens keep throwing trashes on the streets, keep polluting the nature, government cannot do anything about it. People should start thinking and caring about it.

I am absolutely against the abortion and legalization of abortion. It is not moral and its consequences can be harmful. The boys can be preferred to girls, and girl children will be eliminated in our society. We do not know who that baby will be in the future. Perhaps he/she will be an important figure.

We can accept refugees if we have good economic situation. In Oguz where I was born and grown up, I could see the living conditions of refugees, which is very poor.

It would be good if ethnic groups study in their own language at the schools. However, I do not think, it is right to bring this issue up to the university level. This will lead to separation. There should be only one language within the state.

I do not think it is good to have many ethnic groups and ethnic diversity. In the nearest past, they were claiming for their independence. Perhaps it is also understandable that they want to build up their own state. However, in any case it is not acceptable to turn your back and to separate from a country who secured and helped you for many years.

People should support, help and save government and state. There is no people without state or no state without people.

Part II

Everyone has different social masks. We are different persons at our family, with our friends.

I am human first. I do not like emphasizing those characters. If I meet a foreign group, I firstly say my citizenship, that I am Azerbaijani. Overall, for me humanity, being human comes the first. I prefer humanity to religion.

I think religion is a tool to rule people, to keep political power on people. Looking at the history of religions, it is obvious to see that religion is based on fear and rules to control people, to make them obey religion.

Nation means people, their identity, their tradition, their love.

I am not romantic enough to claim that there is no need for borders. There are so many interventions, clashes while the borders exist. Imagine how harder it will be if there will be no borders. It is essential to have borders in today's world. Perhaps in the future people will have higher morals that will allow them to live without borders.

It is good to eliminate those borders through internet and social media. I am easily communicating with my friends from Indonesia, from Egypt without any borders with common German language, for instance. However, when it comes to Armenians, our enemies, I do not think it is good to take borders in internet with Armenians and communicate with them.

Restoration of historical borders happens through war and bloodshed and the outcome is strengthening the nation and nation state. Those territories is our right to gain. Some people might say that I choose war because I do not have relative who will participate in war. However, I have a brother who is military soldier. I think it will be solved through war, solution through peace is not real.

Part III

Because all of our political leaders were/are not brave enough. In the 90th during the war, we lost territories because of it and even recently in April, we stopped winning the territories back because of it. So many people died, but they gave no explanation why it stopped, what we gained. Perhaps there are political reasons behind it that I am not aware of.

Our people are very brave. In April war, every ordinary people were in mood of war, every child and adult were cheering. However, political leader is not brave. Of course, deep within me I would prefer to solve it through peace. They might be Armenians, but they are also human. In April war, in Talish village our soldiers has killed civilians there to take revenge of Khojali. One Armenian girl shared it on social media in Germany language I saw pictures from Talish village. It brought tear to my eyes; I understand that they are also humans. Of course, I would not make friends with them, but they are also humans. With peace, solution is not possible.

My parents are from Yerevan. They were always telling me that, if ever territories will be back and conflict will be over, they will come back, but will never let me go back to those places. They were saying that after some time, the conflict will raise again and they do not want me to be refugees like them. I do not think Azerbaijanis and Armenians can live in Karabakh together. In one or two centuries, the conflict will escalate again. I think only Azerbaijanis should live there, no Armenian should live there.

I think Russia and Armenians are our biggest enemies. We feel more irritated with Russians.

Nagorno Karabakh belongs to Azerbaijanis. It has belonged to us all the time.

We should not trust in international organizations. Only people can solve the conflict. Azerbaijani people. Armenians believe that our lands, our music belongs to them. They do not want to compromise.

I have no idea about the models that can be president .
