3. 23 years old
4. Baku, Azerbaijan
5. Baku, Azerbaijan
6. Bachelor's degree, Azerbaijan
7. No party membership
8. Internet
9. Once a year
10. Azerbaijani speaking

## **Summary**

### **Part I**

The most important one is freedom for me. If a person is not free, and depends on someone, he/she will not be able to live a normal life.

I believe that not only government but also community, private sector can take care of the cleaning of the town. It should not be the responsibility of only government.

The women should have a right to abortion. Because each child is a human and if the child is not planned and not wanted, it is not appropriate to have this child.

Azerbaijan should not welcome new immigrants and refugees. Because firstly it has to fulfill the needs of its own population.

Ethnic groups should have a right to study in their own language and ethnic and cultural diversity is enrichment of one society. I do not see them as a threat.

For me society and human comes first. However, in reality, economy comes first. Therefore, I personally disagree to help economy first, I would choose to help human first.

### **Part II**

My religion is the main part of my identity. Then comes being the citizen of Azerbaijan. All other components comes after my religion and citizenship. For being human is the most important.

I believe that religion is used for good reasons.

Nation is living in the same geographic territory. Of course speaking in the same language also contains in building a nation.

I am personally very idealistic, therefore I believe that borders should not exist. But again in reality, they exist and there is a need for them to exist. I personally do not believe that having border is for ensuring security. For instance, in Europe living without borders is a great example. I also think elimination of borders through social media and internet is good.

I think restoration of historical borders will lead to war and bloodshed. It is very difficult to maintain it through peace.

### **Part III**

I think there is not enough willingness and interest from both sides. Both governments do not have clear vision; therefore, the conflict is still not solved. I think both governments in Armenia and Azerbaijan, also some involved 3<sup>rd</sup> parties should be blamed. Both sides are not willing to solve the conflict, and therefore, third parties are being involved.

I do not see the resolution of the conflict through absolute peace. It may only happen if we will be a strong state. If we will be a powerful state, we can solve the conflict through peace. Otherwise, there will be war and bloodshed. I would surely prefer to resolve the conflict through peace.

Apparently after the resolution of the conflict I do not think, IDPs will return to those territories. They will prefer to keep the households they have in Baku, for instance, but also gain new household in the liberated territories. Living together with Armenians will not be difficult. We are good in forgetting past, so we will forget it and start living together. The young generation will forget and will not keep hatred.

I think Russia is the main enemy of Azerbaijan. Because Russia does not allow the resolution of the conflict. I cannot say in details, because I am not politician.

As a territory, we say it belongs to Azerbaijan. However, historically both ethnic groups have lived there. Therefore, I cannot say exactly to whom it belongs.

I think international organizations are capable of resolving this conflict. The people in both countries cannot solve the conflict, because in the end they depend on the governments.

I have no resolved conflict in my mind, which I think can be a president to the resolution of Nagorno Karabakh conflict.
