Summary

Part I

Of course, it would be better to have all of them. But, last point, protection of fundamental rights is more important that might be umbrella for the rest of the concepts.

No, citizens also should have responsibility. If the citizen doesn't want to keep the town clean, the government clean everything by itself.

As a law, YES. Women should have the rights of abortion.

Rights to live in a place is fundamental rights of human-beings. If there is anybody who wants to live in Azerbaijan, why not.

From my point of view, ethnic minorities should be allowed to practice and promote their culture. They might have centers to study their languages and learn their traditions and culture. But, let's see, what they will benefit, if they study in their own native language. Official language of Azerbaijan is Azerbaijani.

I consider diversity as a threat. It would be right thing to be represented on behalf of Azerbaijan. All the citizens of Azerbaijan have equal rights in the constitutions. Thus, bringing the ethnic diversity into the agenda is equal to disunity.

Value of the government is humans and its citizen. But, citizen cannot have better life without economic development. They are interconnected with each other.

Part II

I have mono identity. I only consider myself as a citizen of Azerbaijan. I am proud of my citizenship and being Azerbaijani.

None of the heavenly religion is not used for worst things. I don't think that none of these three religion might trigger people to get radicalized.

Nation is self-understanding.

Borders are very important. Because, any nation emerges within a border.

Internet? – very bad. Every family has its own order and rules. Europe has some values which is not appropriate to our values.

Restoration of historical border is very dangerous tendency. Of course, it would cause war and bloodshed.

Part III

Main reason is interests of big powers. I mean, Russia Europe and US, Iran, Turkey have its own interests. Finally, Azerbaijan suffers from these.

Big actors are to blame.

If big countries do not want to solve it, we will not be able to settle it. Even if we solve the Nagorno-Karabakh conflict, they will create new conflict in the territory of Azerbaijan.

Two nations have lived together for two centuries, at least. They could peacefully live together, if any power or outsider wouldn't intervene.

All of these options you mentioned are enemies of Azerbaijan.

Of course, Nagorno-Karabakh is historical territory of Azerbaijan. This is fact.

It depends of the desire of big powers and leaderships of two countries.

No. I don't think about it. Territorial integrity of Azerbaijan shouldn't be question.
