10. Azerbaijan and Russian speaking

Summary

Part I

In the democratic country all these concepts are not separable. Currently in Azerbaijan people do not have freedoms, neither economic, social or political freedoms. People have a fear of losing their life and their properties at any time. In a society where human rights are not protected, there is no freedom or security.

The main part of democracy is to give the power to the people and civil society. This kind of local works (cleaning) should be developed and conducted by community, people itself. The role of government should be minimized in the grass roots level. The community should be stronger, municipalities should be responsible for community activities. Government may only monitor the accountability of the municipalities. Municipalities should have their own hospitals, schools, they should be able to collect taxes, and they should develop projects and do fundraising to solve socio-economic problems.

I am interested in religion and read Quran many times. If Quran bans abortion, we should follow it. I am telling it as a professor of biochemistry. No one has a right to kill a living person, except for God. There are conditions where you are allowed to kill another human being and it is mentioned in Quran. Abortion is not included there. Today in Azerbaijan, abortion of girl child is a huge problem. In 10-15 years, the demographic gap between boys and girls will be dramatic.

Welcoming refugees is duty of humanity. There are different ways to welcome and help refugees. It can be either by individuals, who can open their houses and shelter refugees in need. Alternatively, government can have clear policy in order to provide humanitarian and social assistance to refugees. In Azerbaijan both of this does not work. Firstly because people do not have enough welfare to shelter refugees. Secondly, government is corrupted and it embezzles the property of its own citizens. People in Azerbaijan live in poverty. The families of soldiers killed in war, the war veterans, and people with disabilities receive very low social allowance, which is not enough for them to survive.

If there is a public need for ethnic groups to study in their own languages then, they should study in their own language. If it is a small ethnic minority, there is no need for developing a university for them. They should certainly have a right to express their language culture and traditions freely. According to the theory of integration of civilizations different civilizations, groups can coexist together and exchange their culture and tradition. Ethnic and cultural diversity is enrichment for the society. However, it is essential that all immigrants or refugees obey the local law and regulations. Being ethnically and culturally different does not mean to convince your culture to the country that you are moving to or to live according to the previous

laws that you had back in your home country. Each state has its own laws and it is about all social and cultural norms. Meanwhile, government should also maintain the protection of rights of all minorities and ethnic groups.

The best example on this topic is USA. There is a popular narrative among Americans that if USA will be strong I will be happy. Obviously, if the state and government is formed from people, with willingness of people, and maintains people's security and rights, respects and implements the Universal declaration of Human Right, people becomes happy and prosperous.

In large context, in democratic state and free market economy, the citizen should have an access to develop its own business freely. However, government should control the economy, in order to stimulate the internal economy and production, by controlling the customs duties. In order to increase the export potential, government should eliminate the export taxes. These interventions to the economy by the government should aim to develop the economy of the state. In addition, economic relations are based among states. Therefore, they should directly take part in economic development process by participating in external and internal economic relations. Government should encourage its citizens to actively participate in this process, by offering citizens loans, funds and opportunities.

Part II

I prefer to talk about myself statistically. For instance, I say how much children I have, how many books articles I have published, how many years I have works, how old I am etc. I believe people around him/her should define a person's identity. I am author of more than 100 scholarly articles and international scholars has referred to my academic works. In terms of my political activities, I have been recognized as well. Five years ago, the president Ilham Aliyev unfairly withdrew my political mandate during the elections. European Human Rights Court responded to it and Aliyev was required to pay 10.000-euro fine. My human rights have been violated.

I never deny part of my identities, my religion, and my family generation. I am proud of them. My region has no influence to my public identity. I am the first person in Azerbaijan who has explained the scientific definition of regionalization or expressing regional identity. I proved that regionalization is the instinctive activity of the group of animals stemming from arealism. The mammal animals seeks to finds its own areal, region, in order to reproduce and survive. The regional, cultural, ethnic diversity does not mean to discriminate or separate from that group. Regionalization does not mean to nepotically bring the persons from your region into power.

Religion is for good. However, terrorist groups are developed through big powers, in order to control the regions different from the west and to discredit Islam in the world. The religious places in Azerbaijan are owned and control by some political groups, aiming to empower that certain political group, has no relations with the real religion. There are extremist religious people, supported by external groups. Real Islam is a religion of harmony.

The first component of the nation is language. Existence of the nation is defined by the independent state it has formulated.

I would like to emphasize that the extinction of the nature and the violation of the ecological balance is a huge problem. Nuclear weapons are huge threat to the humanity and civilization.

Two essential documents has shaped the humanity. Firstly, Universal declaration of Human rights has preserved as a constitution for the humanity. Secondly, Helsinki Declaration which has assured the territorial integrity. It is a historical act to stop wars and interventions to the borders of other states. The biggest victory would be the elimination of the borders. However, the

civilization is not developed enough to eliminate the borders around the globe. Elimination of borders in the social media or internet is good. It is a great tool to share information. According to the Helsinki Declaration, it is a crime to violate the borders of other states.

Part III

In a TV program years ago I was in a debate discussion on Nagorno Karabakh with Siyavush Novruzov, who deliberately supported the policy of government towards the conflict. I said that, as long as the Aliyev's government will remain in power, there would be no territorial integrity. If Azerbaijan people wants to gain their territorial integrity they should change the political regime. Because Heydar Aliyev came to power through support of Russia by giving the territories to Armenia.

I see the biggest guilt in Azerbaijan nation. Of course, external powers should be blamed as well.

There are three popular narratives, mentioned all the time: political solution, military solution, and political military solution. However, there is an essential component comes before all these three solution. First, the government should be elected by the democratic elections, and serve for the social, economic, military development. Economy should be developed. Human rights and freedoms should be protected. After the development processes, we can decide by which way we want to solve the conflict. As a humanistic person, I would prefer not to have war and bloodshed.

The main responsibility for Azerbaijan is to ensure the protection of every Armenians. Meanwhile, friendship is more important than enemy hood. The resources should be exchanged in the region in order to develop the region. It will not matter for the Armenians whether or not to live in Azerbaijan or Armenia, as long as we can ensure their socio-economic development, maintain their human rights and protection. The whole world is integrating and we will be able to co-exist together.

I think the question of biggest enemy is problematic. I do not accept to blame nations, to blame people. For instance, it is not appropriate to blame Russian individuals, from whom I have received empathy, support, and respect. Strategically we should collaborate with West, because West is democratic.

Nagorno Karabakh belongs to Azerbaijanis and Armenians who live there.

Azerbaijan nation is able to solve the conflict. Azerbaijan nation should democratically change the political regime, and co-exist with government.

There are few conflict models, but they cannot fully apply to Nagorno Karabakh. Because Karabakh is Azerbaijani land, and Armenians are relocated there by Russians. This territory belongs to Azerbaijan. In any case, Armenians living there must be respected.
