## **Summary**

### **Part I**

The most important one is freedom. Everything can be possible, if freedom exists.

No. the government should ask private companies to take care of the cleaning of the town. The government is not supposed to clean streets.

Abortion? – Women may have rights of abortion.

No. Azerbaijan should not accept immigrants or refugees from abroad. This country has its own enough refugees.

There is only one official language in Azerbaijan. Everybody including ethnic groups should be able learn and speak in official language. But, they can study in their own language in secondary school, but not at the university.

Ethnic and cultural diversity is good thing in a county. If there are several ethnic groups in a country, then, they will show their culture, which is multicultural society.

People establish the government. At the same time, if there is not government, there wouldn't have people. Both of these things interdependence from each other.

### **Part II**

I am a citizen of Azerbaijan. I only mention that I am Azerbaijani, wherever I go...it doesn't matter I go any country or town. I don't mention that I am from Jabrail or somewhere else.

Every nation has its own religion. And, I think that religion is used for positive things.

Nation is territory.

Borders between countries are important things. In ancient times, there used to exist bandits in different countries. Jabrail is located in the border of Iran. If we wouldn't have borders between Azerbaijan and Armenia, they could easily loot us and take our cattle with themselves. Border is essential to stop enemies to enter in the country.

It is good. People can easily communicate with themselves, if their relatives live far away or from them in another country.

The restoration of historical borders would cause war and bloodsheds. But, I think, we should return our historical borders back even people will be killed. Of course, it would be better to use political method.

### **Part III**

The “key” of the resolution of the Nagorno-Karabakh is in the hand of Russia. Armenians are not independent. They are such a weak nation. But, Russia is a big power that support Armenia. As a ex-combatant, I can tell that in a time, when the war started in early 90s, we did not have proper army, leader. And, nowadays, foreign countries do not let us to return our lands. They are the main culprit.

I would prefer to solve this conflict in peaceful way. But, if it is gonna be impossible, I would rather to start the war. I believe that if we start the war, we will win the battle.

We will live together with Armenians as we used to do it during the past...Soviet times. Our grandfathers also killed each other few centuries ago. But, then they started to live together. That's why, I believe that we can also live together.

The biggest enemy of Azerbaijan is Armenia. I would say Russia, but if there is Armenia, I say, our biggest enemy is Armenia.

Nagorno-Karabakh belongs to Azerbaijan.

Only Russia is able to solve this conflict.

No, I don't know any precedent conflict from other countries that might be applied for Nagorno-Karabakh case.
